

ENTREPRISE POUR LA CONSERVATION DU PATRIMOINE

GARNIER OPERA HOUSE

Repair of the cornices and sculpted decoration using medium-hard limestone Altar® mortar and restoration of the marble frames and banisters with Altar® marble.

ABOUT ECP

Precise assessment, appropriate solutions, transmission of good practice: in order to ensure the **longevity of built heritage**, ECP serves both the men who originally built it and those who maintain it. Their products and techniques for the conservation-restoration of stone materials are developed with a constant concern for **innovation, respect for the support, the user and the environment.**

ARLES ARENA

Restoration using Altar® hard limestone mortar applied between 2008 and 2010.

PRODUCTS AND SOLUTIONS

ECP manufactures and distributes a complete range:

- REPAIR MORTAR, with physical-mechanical and aesthetic properties similar to those of stone, **100% mineral**
A complete range for all mineral surfaces: limestone, sandstone, tuffeau, brick, chalk, concrete, marble...

- PROTECTIVE PRODUCTS :
water-repellent, anti-graffiti...
Aquasil 101P, Syra-Fuge 111P®...
- PATINA AND COATING PRODUCTS, with photocatalytic properties
Aérolasure®, Syra-Color®...

THE RAPE OF THE SABINE WOMEN

Laser cleaning of the sculpture

Our R&D team also develops specific solutions to deal with particular issues faced onsite.

TRAINING AND TRANSMISSION

ECP, an approved trainer, provides personalised technical training based on their **concrete on-site experience**. Our training offers perfectly adapted solutions in terms of **technical compatibility**.

They also facilitate optimal use of the procedures to guarantee both the **quality of results** and a **saving of time** on site.

Discover our complete catalogue of training at our website:
www.ecp-fr.com

LASER RESTORATION

ECP offers the **sale**, and **hire** as well as the maintenance of cleaning lasers by El.En (Electronic Engineering), the world leader in the field. Our engineers and technicians will train you to use these lasers. They will provide you with **assistance and advice** on the best choice of laser depending on the support to be restored, the pathology and the specific constraints of the site.

TYPES OF APPLICATION :

- Cleaning of mineral supports (stone, plaster, metals, glass etc.) and organic supports (woven materials, paper, wood etc.)
- Strippers for paints, graffiti...

Our Ornatis coatings can be machine sprayed or applied manually.

Discover the full range of lasers offered by ECP on our website:
www.ecp-fr.com

ANALYSIS AND ASSISTANCE

Our team will accompany through each stage of construction:

- Analysis of pathologies and upstream studies
- Advice on the choice of technical solutions that respect the build and rules of the profession
- Site launch and intervention at your request during construction operations in order to guide you in the best usage of the products

VAUBAN DAM

Desalination of the downstream facade of the dam, located in Strasbourg, using a desalination compress from the Advectum® range.
